WORK EXPERIENCE

Hokenso Sdn Bhd, PJ **Jun '24 – Present**

Business Consultant

- Engaged clients in workshops to understand their business needs to develop impactful product features and enhancements.
- Acted as an owner for user-facing modules, defining and ensuring the product backlog features are developed per the signed-off specifications.
- Managed product delivery timeline and strategy by collaborating with developers and QC to ensure the product is ready for testing in UAT.
- Managed client expectations on product enhancement roadmap and defect resolution in daily and weekly sync-up meetings.
- Managed QC test cases by reviewing draft test cases and providing feedback to optimize test scope coverage.
- Conducted Train-the-Trainer sessions to reinforce client's understanding of the product's essential features.

GrowthOps Asia, Kuala Lumpur **Feb '23 – Jun '24**

Business Analyst

- Facilitated product development-centric discussions and solution design sessions aiming to improve user experience.
- Facilitated internal workshops to increase awareness and product knowledge, reducing the learning process by a factor of 50%.
- Scheduled and facilitated various workshops, thereby expediting the requirements study process.
- Elicited business requirements from clients through meetings, translating them into technical and functional requirements.
- Provided product support and training to internal teams, stakeholders, and end users, acting as a Salesforce subject matter expert.
- Conducted QA testing on Salesforce implementations.
- Developed and presented product documentation to stakeholders and end users, enabling an increase of 30% in user adoption rates.
- Provided training and guidance via Train-the-Trainer style workshops.

Innergia Labs Sdn Bhd, Kuala Lumpur **Nov '21 – Feb '23**

Business Analyst

- Elicited and analysed business requirements from clients through meetings and workshops, translating them into functional requirements.
- Defined and addressed client requests, working together with developers and designers to ideate and implement solutions.
- Provided product support and training to internal teams, stakeholders, and end users, acting as a data analytics subject matter expert.
- Conducted SYCARDA dashboard demos during pre-sales presentations.
- Conducted unit, functional, and user acceptance tests alongside developers and performed QA checks on the SYCARDA dashboard.

- Managed customer master data, monitoring creation, deletion, and maintenance of data.
- Designed and developed interface wireframes and mock-ups.
- Developed and presented product documentation to stakeholders, clients, and end users.
- Improved product stickiness by conducting training workshops for 80 outlets across the FNB and Pharmaceutical verticals, assisting in bringing in 2 years' worth of client renewals.
